Create image layers in a WYSIWYG (what you see is what you get) manner using the Crop Tool, and then add text and other imagery later. Use nondestructive editing using the History panel to save and reuse images. Provide layers for seamless compositing, which enables more complex editing later on. Apply filters and paint in layers, and use masks to hide and reveal parts of the image. For more complex images, try using the Brush tool to erase and colorize areas, or use the Gradient tool to paint in color. Photoshop also offers a broad set of online support resources, the best of which include Photoshop.com, CNET Editors' Choice website, and the Photoshop image forums. Another popular free image-editing program is the free, open source GIMP, which stands for GNU Image Manipulation Program. Although it lacks all the features of Photoshop, GIMP also offers many free tutorials, as well as online support resources. Capture and edit digital images from a camera, import digital photos from a memory card, and manipulate images on the computer. Capture images from a camera with any digital camera or smartphone, and save as either a JPEG or RAW format. Edit your photos using Adobe Photoshop Elements. You can import your images from a memory card or USB drive and then edit with the tools of Photoshop or GIMP. Import digital photos using the original camera, using a memory card, or from a CD/DVD. Merge or split a single image into multiple images. Use image-editing software to apply effects, such as color correction, image cleanup, and retouching. Create and edit mask files to selectively hide parts of an image. Create and edit layer styles to quickly and easily apply effects. Use the eraser tool to erase parts of an image, by eye or using an eraser tool. Apply filters and adjust the appearance of an image. Smooth or sharpen an image. Use basic image editing tools to crop, rotate, and enhance an image. Jan 15, 2017; St. Louis, MO, USA; San Francisco 49ers quarterback Colin Kaepernick (7) celebrates after throwing a touchdown pass against the St. Louis Rams during the second half at the Edward Jones Dome. The 49ers won 20-13. Mandatory Credit: Scott Rovak-USA TODAY Sports The San Francisco 49ers are not going to win the Super Bowl next year. It just won't happen. The offseason is done and the real work is about to begin. Training camp is right around the corner. This leaves me time to look at my 2017 NFL Draft rankings, which is always an interesting exercise. I didn't rank players until this season as I thought it might be beneficial to see where I actually think players are going to be ranked next season. Until this year, I didn't rank players until I was almost completely set with the draft board, but that is changing this year. Let's take a look at the 49ers 2017 NFL Draft board as we know it. Tier One Quarterback: A.J. McCarron, Alabama – Throw for throw, there is not a better player at this position Running Back: Dalvin Cook, Florida State – The proven stud from Florida State will run through his opposition and possibly help your quarterback look better than he does in a regular season setting Wide Receiver: DeAndre Hopkins, Clemson – One of the best receivers in the entire class. I don't think that he'll be an immediate starter, but he'll be a weapon for the niners for years to come Tier Two Center: Billy Price, Ohio State – A lot of these offensive line spots can be interchangeable. Price is too good to pass up Top Tackle: Connor Williams, Texas Guard: Wes Martin, Notre Dame – If you look at his career at Notre Dame, he has been a better passer blocker than a run blocker. I do think he'll be a better passer blocker than a run blocker, but it's not a certainty Defensive Tackle: Vita Vea, Washington – I couldn't decide between this guy and Taven Bryan, but the gap between these two is very small Top Linebacker: Roquan Smith, Georgia Corner: Quincy Wilson, Florida – A lot of these top 50 players are all very similar in terms of their college
